

# 2024 Environmental Report Featuring carbon neutral

*LSI Stone aims for carbon neutrality by 2030*

## REFORESTATION:

Reforestation represents an effective means of restoring ecosystems, offsetting carbon emissions and creating new planting campaigns.

## ELECTRIFICATION:

LSI Stone's objective is to increase the proportion of solar energy generated at our factory, with the goal of covering approximately 80% of our total energy demand at our facilities.

+ 80%  
clean energy

## SUSTAINABLE TRANSPORTS:

The company is committed to reducing its environmental impact by gradually replacing its transport fleet with electric and hybrid vehicles, which will substantially reduce air pollutant emissions.

## SUPPLY CHAIN SUSTAINABILITY:

LSI Stone is working closely with its suppliers to promote sustainable practices in the extraction of natural stone, including responsible mining practices.

## Environmental Responsibility Overview

Sustainability is at the core of our corporate mission. We are committed to reducing our reliance on fossil fuels, investing in new technologies and using only renewable energy sources. By optimising in-house electricity generation and upgrading equipment, we are able to continuously reduce our environmental footprint and drive positive change.
